

Protect you network with secure and reliable Solutions from Secutrends.

With highest quality and system stability Secutrends Firewall/VPN Appliances are the ideal platform for secure and reliable security concepts.

Pre-installed Astaro Security Linux gives comprehensive protection of business critical resources and information. This easy to manage All-In-One security software integrates the most proven technology to assure a secure and scalable solution.

Due to extensive service and support, applied accessories and an included 24 hour on-site-service (next business day) the hassle-free implementation is guaranteed in sophisticated environments.

Secutrends Firewall Appliances A20 & A2000 - Your Security Appliance Dream Team!

Secutrends Firewall A20
The 1 GHz CPU guarantees high performance internet access and provides sufficient resources for upcoming versions of Astaro Security Linux. Firewall, Proxy or VPN Gateway: The Secutrends Firewall A20 is always a reliable component of your security infrastructure. Passive cooling without any disturbing fan noise makes this appliance an ideal solution for every purpose - even on your personal desk.

Secutrends Firewall A2000
Committed to enterprise application the A2000 is prepared for sophisticated environments without compromise. With the 3 GHz CPU and 1 GB of memory this appliance is the ideal solution for mission critical tasks. Providing up to 12 x 10/100/1000 network interfaces and the certification in essential industrial standards, the A2000 is prepared for almost any present and future claims.
